1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 2, 4 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese reference 6-155110 (cited by applicant). With reference to fig 2 the axial locating member is at 3. With reference to Fig. 1, the upper and lower clamping abutment surfaces are the surfaces at the top and bottom of the figure. They meet the limitation “clamping abutment surfaces” because they are inherently capable of being clamped.

3. Claims 3, 5-7 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 9-16 and 19-34 are allowed.
